

Get Your Turf on WhatsApp Booking

A one-time Meta setup guide for turf owners

This sets up your business on Meta and connects your WhatsApp number to the GameOn booking bot. You do it **once** per turf. Pick **Guide 1** if GameOn sent you a “Connect WhatsApp” link — it's the 5-minute route. Use **Guide 2** only if you're setting everything up by hand.

Before you start — have these ready

- A **personal Facebook account** you control (you'll be the admin behind the business).
- Your **business name** exactly as you want it shown to customers.
- A **business email** address Meta can contact you on.
- The **turf's mobile number** that will be used for WhatsApp.
- **Proof of the business** for verification — any ONE showing your legal name + address: GST certificate, Shop & Establishment / trade licence, incorporation certificate, or a recent utility bill / bank statement in the business name.
- Your **business address, phone, and website or social page**.

Do NOT delete WhatsApp from your turf number

If your turf already uses this number on the WhatsApp Business app, **keep it**. GameOn connects using **Coexistence** (the app and the booking bot share one number). Removing the number to “migrate” locks you out of the app permanently. Just make sure a **profile picture is set on the number before you connect it**.

Connect with GameOn's link

GameOn sends you a **“Connect WhatsApp”** link (this is Meta's official Embedded Signup). One guided popup creates your business portfolio, sets up your WhatsApp account, adds and verifies your number, and connects GameOn automatically — no separate verification paperwork to chase up front.

1. Open the **Connect WhatsApp** link GameOn sends you, on a phone or computer.
2. Log in with your **personal Facebook account** when the popup asks.
3. Choose **Create a new business portfolio** (or pick an existing one), and confirm your business name and email.
4. Enter your **turf's mobile number**, set the **display name** (the real turf name — WhatsApp reviews it) and category (Sports/Recreation).
5. If the number is already on the WhatsApp Business app, pick **Coexistence** when offered so you keep the app.
6. Verify the number with the **OTP code** Meta sends by SMS or voice call.
7. Finish the popup. GameOn is now connected as your provider — **that's it**.

What about business verification?

You can start taking bookings straight away — full **Business Verification** isn't required to begin, and your daily limit rises automatically over time. When you're ready to remove all limits, do the verification steps in the manual guide (Guide 2, Part B). GameOn will tell you if/when you need it.

Set up & verify your portfolio yourself

Use this only if you don't have a Connect link. Budget **30–45 minutes**, plus review time from Meta. Do it on a computer.

Part A — Create your Meta Business Portfolio

1. Go to **business.facebook.com** and log in with your personal Facebook account.
2. Click **Create a business portfolio** (older name: “Business Manager”). If you have none yet, you're prompted automatically.
3. Fill in your **business name**, **your name** (the admin) and **business email**.
4. Click **Create**, then open Meta's confirmation email and click the link to **confirm your email**.

Part B — Verify the business

This proves you're a real business, raises your messaging limits and unlocks full features.

1. In your portfolio open **Business Settings** (gear icon) → **Security Centre** (or **Business Info** → **Verification**).
2. Click **Start verification** and enter your legal business details — name, address, phone, website.
3. Enter them **exactly as they appear on your documents**. Mismatches are the #1 reason verification is rejected.
4. If Meta doesn't find you automatically, **upload a document** (GST certificate, trade licence, utility bill or bank statement) showing the same legal name + address.
5. Verify the business phone or email with the code Meta sends, then **Submit**. Review usually takes minutes to a few days (occasionally up to ~2 weeks).

You can keep going while this is pending

Business Verification can run in the background. A blue badge is separate — that's the optional paid **Meta Verified** subscription, not required for bookings.

Part C — Add & verify the turf's WhatsApp number

1. Go to **WhatsApp Manager** (business.facebook.com/wa/manage) inside your portfolio.
2. Choose **Add phone number** to create a new WhatsApp Business Account.
3. Set the **display name** (the real turf name — WhatsApp reviews it), **category** (Sports/Recreation) and language.
4. If the number is already on the WhatsApp Business app, choose **Coexistence** so you keep the app.
5. Verify the number with the **OTP** sent by SMS or voice call.
6. Add GameOn as a partner: **Business Settings → Partners → Add partner**, and share your WhatsApp account with the **Partner Business ID** GameOn gives you.

Number limits to plan around

One number per WhatsApp account, and a portfolio can hold a **maximum of 4 Coexistence numbers**. Several turfs on one portfolio is fine; a very large operator may need more than one portfolio.

Part D — Hand off to GameOn

Once the number shows **Connected** in WhatsApp Manager, send GameOn:

- Your **Phone Number ID** (WhatsApp Manager → your number — the numeric ID, not the phone number itself).
- Your **WhatsApp Business Account (WABA) ID**.
- Confirmation you've **added them as a partner**.

GameOn then wires up the booking Flow on their side — nothing more for you to touch.

If you get stuck

What you see	What it means / how to fix it
Confirmation email never arrives	Check your spam folder, then resend from Business Settings → Business Info.
Verification was rejected	Your legal name or address didn't match the document. Re-enter them to match the paperwork exactly.

What you see	What it means / how to fix it
"This number is already registered"	It's on the WhatsApp app already. Choose Coexistence — do NOT delete it from the app.
The OTP code never arrives	Switch between SMS and voice call, and confirm the number can receive messages/calls right now.
GameOn can't see your account	You haven't shared it as a Partner yet. Do the "Add partner" step and re-send them the IDs.

Questions? Reply to GameOn on WhatsApp or email your account contact — we'll finish the technical setup on our side.
